

# High quality reel solutions

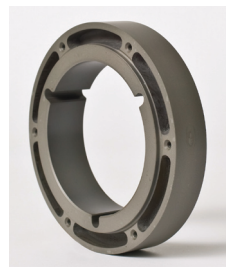

AcroReels is the preferred manufacturing partner for high quality reel solutions. ATEK's high precision aluminum reels meet our customers' needs serving the SMT, medical, energy technology, and recording markets. ArcoReel brand of open reel products are manufactured with exacting tolerances and precision leveling, ensuring a high quality product. With over six decades of experience, we work with our customers to provide the right solutions for each application.

AcroReel's open reel production area is equipped with the latest in aluminum blanking, precision secondary machining operations, anodizing and precision leveling technology ensuring a high quality, high volume product. Standard reels are available up to 16" in diameter, and custom reels and hubs can be produced in numerous sizes and in several anodized colors to meet any customer specifications.
